SERVICES :

Swecha, by the name, is well known for an operating system. Balaswecha operating system for school going students, which has been used by many government schools in Telangana and Andhra Pradesh. eSwecha an operating system developed especially for Engineering college students which is also adopted by many engineering colleges. **Swecha** has a Code repository "code.swecha.org" which has the projects done by all students trained at Swecha. Along with code repository Swecha also has a learning repository called "learning.swecha.org".

eSwecha is an operating system completely for the engineers by the engineers and to the engineers. Its Purpose is to fulfill the needs and requirements of the modern engineering students and it has all the FOSS Academic software and tools which are more worth like proprietary licenses software, modern, elegant and comfortable operating system easy to use.

Some of the reasons for the success of eSwecha are:

- It works out of the box, with fully education tools, multimedia support and is extremely easy to use.
- It iss both free of cost and open source, It is safe and reliable.
- It is community driven, Engineering students from different colleges with their ideas can be used to improve eSwecha.
- Based on Debian and Ubuntu, it provides about 30,000 packages including all engineering packages and one of the best software managers to install software and tools.
- Thanks to conservative approach to software updates, a unique Update manger and the robustness of its Linux architecture, eSwecha requires very little maintenance (no regressions, no antivirus, no antispyware, no antimalware ... etc).

Inspired by the Free Software philosophy **Swecha** has come up with the idea of localizing the operating system. **Swecha** believes that the technology which is not in the reach of a common man is worthless. In order to fill this gap, **Swecha** thought of localizing the operating system and started porting it in villages and **Swecha** was very successful in this trial.
