7.1.1. Institution shows gender sensitivity in providing facilities such as:

1. **Safety and Security**
2. **Counselling**
3. **Common Room**
4. **Day care center for young children**

Response:

The institution fosters a conducive atmosphere for gender equality through enhancing comprehension of significant matters and facilitating equitable interactions between individuals of different genders. In order to create a welcoming environment for students from diverse backgrounds, the institution offers the following amenities.

Safety and Security:

The institution has implemented CCTV surveillance across key areas such as the main gate, parking lots, entrance, canteen, boys' and girls' hostels, and corridors to ensure better monitoring and supervision. The security services operate round the clock on the campus.

Complaint boxes are strategically placed throughout the institution to allow students to express their grievances and suggestions. These boxes are accessible in various areas.

In situations where students need to leave the campus due to unavoidable circumstances, they can submit a request to the faculty, along with reasons. The faculty then communicates with the student's parents or guardian to ensure the request is legitimate. Additionally, the institution collaborates with the police department to organize awareness programs on safety and security. Students are informed about the availability of SHE teams, who are accessible 24/7 to address any crimes involving female students. Moreover, students are educated about the Hawk Eye mobile app, which can be used to alert the police in case of serious problems.

Hostel students are provided with specific visiting hours, and appointed wardens take care of their needs, address problems, enforce rules and regulations, and provide guidance accordingly.

Student Counselling:

The students of our institution consist of individuals from diverse backgrounds and cultures, each with their own societal and financial complexities. At times, these students may face stress and depression, which can lead them to make impulsive decisions such as self-harm, isolation, rumination, or even discontinuing their academic pursuits. To address and overcome

such situations, the institution has established a comprehensive counseling system that caters to academic, personal, and career-related issues.

To ensure the well-being of the students, each faculty member is assigned a group of 15 students for one-on-one counseling sessions, with utmost respect for the student's privacy. In more severe cases, professional counselors are available to provide the necessary support. Through counseling, students are encouraged to develop as compassionate individuals by receiving guidance on social and ethical matters.

Common room:

The institution boasts spacious, well-ventilated common rooms available for both male and female students. There are four common rooms dedicated to girls, each accommodating up to 300 individuals, and two common rooms for boys, with a capacity of 150 each. These common rooms are thoughtfully equipped with various amenities, including drinking water facilities, hand wash basins, first aid boxes, chairs, tables, washrooms, and other necessary provisions.

To ensure a safe and conducive environment, the girls' common rooms are supervised by senior faculty members assigned specifically for that purpose, while the boys' common rooms are monitored by their respective senior faculty members.
